Stephanie/Kristen, I think folks are running into firewall issues because of the zip file extension. I was able to open the file. It might be easiest to post the file onto the SharePoint site and folks can copy it down from there.

Hi Kristen – we can't seem to open the file. It says it's not a valid archive. Could you please check and re-send?

Thanks!

Subject: Preliminary HV data

Scott and Sharon,

Attached are the data we have for the HV sampling conducted in December and January.

These data are incomplete and draft, but should be adequate for you to work with to evaluate the program.

Please share as appropriate, and direct any questions about the data and format to Jim Herberich.

Thank you!

Kristen
